

EXTENSION OF THE CALL FOR APPLICATIONS

ARTIFICIAL INTELLIGENCE DEVELOPER AND DATA ANALYST PROGRAMME

English Edition 2026–2028

ITS DIGITAL ACADEMY “MARIO VOLPATO”

This Extension forms an integral part of the **Call for Applications for Admission to the Programme Artificial Intelligence Developer and Data Analyst – English Edition 2026–2028**, published on 1 April 2026.

The purpose of this Extension is to regulate the reopening of the selection process through a **supplementary selection session**. Participation in this supplementary session is reserved exclusively for applicants who did not take part in the previous selection period.

All provisions contained in the original **Call for Applications** remain unchanged, except for those expressly amended or supplemented below.

AMENDMENT TO ARTICLE 3 – SELECTION PERIOD AND ELIGIBILITY REQUIREMENTS

Given the high number of applicants who participated in the selection phase opened on 1 April 2026 and concludes on 19 June 2026, ITS Digital Academy has decided to activate a **supplementary selection session**. Applications for participation in the supplementary selection session may be submitted **from 20 June 2026 until 17 July 2026 (application deadline)**. The supplementary selection session will be carried out **exclusively online and on a rolling basis**, from **20 June 2026 until 24 July 2026**, unless further extended. The publication of this Addendum shall be considered an extension of the original Call for Applications. ITS Digital Academy reserves the right to further extend the deadline of the supplementary session should places remain available in the programme. The selection is open to applicants who already hold one of the qualifications listed in Article 3 of the original Call for Applications, namely:

- a High School Diploma (Diploma di Maturità) issued by the Italian Ministry of Education and Merit;
- an equivalent foreign qualification officially recognised by the Italian State through a Declaration of Value (Dichiarazione di Valore) or equivalent recognition document;
- a vocational education and training diploma (IeFP) paired with a Higher Technical Specialisation Certificate (IFTS).

Applications must be submitted online through the following website:

<https://itsdigitalacademy.com/selections-english/>

All admissions shall remain subject to the provisions set out in the original Call for Applications.

Noventa Padovana, June 17th 2026
